Engineers are one of the most deadly units in the hands of an expert. Even relatively poor players can inflict decent damage if he is lucky. Experts have a lot of options available at any given time - should i repair my teammates tank, or is it ok? should i shoot the enemy engi with my pistol? should i sneak up behind the sniper and blow him up wiht my remote c4, should i risk c4 that stealth tank? should i return to base and repair that building? Should i try a rush?remote c4 is lethal!proximity is even more lethal!
