quote:Originally posted by LazrClawz:You can't use this trick (well you can if you want to lose the APC   ) with remotes [Edit: your own] or when you hop out, the APC will be neutral and be damaged/destroyed. I use Proxy Mines too. You have to work too hard with timed c4 to get the timing right.u can use it and keep apc put them on get in and run into an enemy tank keep moving into it so it cant turn and ur apc is in contact and they explode they wont hurt your apc if you stay in so use timed this trick works best during rushes i killed of a mammy with full life/armor
