It is also fun to lay 20-30 timed c4's at the mct of a vulnerable building(at the begining of a game) to a rush..... this will give you a 30-35 second window of non-stop explosions that will sheild the mct to any sort of rushes.... this will also allow you time to buy a tech/hotwire to mine buildings.....would you call that a glitch since you can lay 20-30 of them and then walk away under another character???
