On walls-flying, on the WF. When you get up the ramp and get on the second platform, there should be a ledge to the right (at the side of the base mountain wall). The beacon can't be seen from below and if no one leans forward to look down, it will not be seen from above as well. To add something extra sneakyness, jump down (if you have enough health) and start shooting the WF. GDI is then bound to look for a beacon on the ground. If they after that do find your beacon (which is most unlikely), it's to late to disarm it..
