For everyone who plays renegade: Place a few remote C4 on your vechiles before you go out into battle (do not overdo vechile mining). This is for people who like to repair thier vechile in the middle of the field, it will stop tank stealers from stealing your tank. If they do you can just blow it up with the remote C4. This works extremely well for GDI because NOD has stealths , etc. And as for blazers tatic he to should place remote C4 on his cheap vechile, Then blow it up when it is time to.
