Subject: Has anyone ever tried to plant a beacon on top of the enemy

I was wondering if that was a viable option. I was sitting around last night thinking of some new tactics and this one came to mind. Hop on top of your own harvy and ride it out next to the enemy harvy, or if it is a flying map use the Orca or Apache to drop onto it. Jump to it and wait until it is close to the enemy base and then plant the beacon.
