use the map to your advantage, if your a sniper get up high or inside a building and shoot then move.if your running from a vehicle head to an area it cant pass or will have trouble moving through.if in trouble slap c4 on someones face then they cant aim to hit you, plus its so funny when they explode.mammoth tanks have trouble turning so slap c4 on their rear and run, then shoot them from range or call in some team members for support and nail it fast.helicopters have trouble shooting directly under them so stand there and shoot up with rockets is a good way to nail them.
