got to:PSX converter, N64.... Download dpadpr50.zip, this contains the drivers that i use to run the converter, it also contains diagrams to create other converters for consoles within the zip file. This converter i had made uses your LPT1 port(printer port). To create it you will need: A psx extension cord (or your controller)   1 DB25 black shell   1 25pin MALE DB 25 connector 1 9 volt battery and battery snap   5 x 1N914 diodes   soldering iron   solder understanding of how to read the diagrams DO NOT do this unless you know what you are doing
