Worst Map EverIts even all the way really. i find stealth tank rushed work way better than flame rushes on any map. 1 person spots the first lumbering flame tank. by the time they get to the base theres 3 hotties in the AGT, and 5 PICS slaughtering the flamers.. with stealths. they come from knowwhere. BOOM goes the AGT. if theres techs inside, 1 missile to the head thru the door and there done, which cant be done with the crap flamers
