I hate the tactic parking behind the entrance for the harvester....its so cheap(yah if I see im not making any money and I know the refinery is still alive its the first thing I look for when that happens) but even though its simple to get by its still stupid I think.....funniest thing is destroying the war factory from the inside out(once took a stealth tank in there and shot it from the inside and noone even knew....what goofs....they sho\uldve bought a vehicle to knock me out oh well.
