quote:Originally posted by NinjaGod:actually the phrase is this: "Arguing on the internet is like running in the Special Olympics. Even if you win, you're still retarded." anyway... it's a stupid phrase. I used this line countless times on Infantry Online. So I made it a macro and whenever an argument started, I'd hit the button to which it was assigned and they would shift the argument to me, and i'd be a part of it .It was worth it however.
