Hi, i know that this is in the wrong forum but the main one is filling up with crap none related to Renegade so an answer isn't gonna be as good as yours in here. Well i was up my friends house (his WOL nick is zerokhool) yesterday and he was playing and suddenly a message came up sayin "Expected data tampering by Zerokhool" he looked at me and said "what the hell is that!? It always comes up for me!" and he was right a couple of games later it came up again! ANd sometimes he gets booted from the game if the hosts sees it. Whats wrong? He is not using any aimbots or doing anything wrong! So if any of you know please reply and tell me!!!
