Look Jeg, I never said I had any cheats. YOU are the one that said that only you and 4 other people have a "shoot through the mountain hax". I have had a standing challenge for months for anyone to prove any sort of multiplayer cheat or hack. NOBODY has claimed it. Know why? They don't exist! Don't try giving us the story of how they don't want to share it, because the rules of my challenge say that I don't need to see the code of the cheat, just have it demonstrated to me. I like how you say I would be "cowering" in my mobile art... You are the same kind of n00b that accuses an entire team of "camping" just because they are defending their base against an aggressive assault. I stand by my tactic that the mobile art parked next to the HoN is a GREAT DEFENSIVE TACTIC, and STOPS MOST ATTACKS ON THE HoN. That's all I'm saying, and you cannot disprove this. Please stop bringing other issues like nonexistent hacks and whatnot. Go back to cleaning your gutters, I'm playing Renegade and owning ppl like you
