so youre not a newb... yet you've come to the realization that mammoths suck sh*t when????
hmmmmm you do seem to take the tank from a newbies prespective if it has taken you this long
to post something about mammoth tanks.... oh... and mams can be good in ceritan situations.....
but only as clean up... when some of the key structures in a base have been taken down....oh...
and yeah... you are a newb... if you think that b*tching about a situation which tilted the game in
your direction is a good thing... so what if they lost cuz they rushed yoru base with mams... wtf is it
to you???.....they had what??? better snipers.... better tank skills... and better team work.... why
the f' not be happy you won?.... capitalize on their stupidity for chr*st sake....
