Have you ever seen a group of 5 mammoths roll into a base? its a scary thing when your the other side, like you said seiging gets nod lots of points off of mammoth tanks but if your team is smart and everyone rushes in Wow, game over. I rarely use mammoths as well, i mostly use them on mesa in the tib feild so i can seige all there buildings{except refinery} and it can take a pounding.I just wish it was cheaper{its over priced like crazy}
