I used to have a 56k and games were just to laggy to go for base attacks, so i used to either defend or just go round killing infantry. But now i have broadband i want to start assaulting bases and planting nukes! Im not a n00b or anything but i just can't do it, i normally just get killed before i reach my destination, or even if i don't i go to plant the beacon and i get killed while doing it! Anyone got any tips?
