Beware of DJTachyon on the Ultra Fast Server. Playing in Hourglass today as Nod. Hand was down and things looked grim. We organized multiple flame rushes and finally took out the AGT. WooHoo! SERVER SHUTDOWN!The nOOb host shutdown the game, and GDI won because they had more points. Half of the players started *****ing, which they should, but DJTachyon just chuckled and typed LOL,LOL,LOL.For some stupid reason I stayed. Next map was field. Again I was Nod. Some of our players start the tunnel nukes on the refinery. A tactic that BOTH sides can use. What does DJTachyon do? He deactivates the beacon ability. I type some choice words and leave.If I was in the same room as him I would beat the living tar out of him. He makes a great game frustrating. I call out to all to make this jerks existence on WOL a living hell.Is the DJ a clan name? If so, they must be a clan of wimpy nOObS.
