Well, I've tried it several times in 1 player LAN. The trick of Mobius, Mendoza, Sydney Prototype and Raveshaw are all correct. They can destroy a building with their ammo. Except Raveshaw I haven't tried doing it without C4. But you won't be able to do it in MP games because when you destroying it, some enemies will be noticed and come to stop you. However, I haven't tried the others yet. I'll go to try it when I have time.
