I just love it when people try to argue without knowing WTF they are talking about. You CAN destroy a building with just the volt rifle. Unlike you, Im not talking out of my ass, I have done it and its a FACT. Tell you what...start a 1 player Lan game. Go into the Nod refinery as Mobius and you will find that the 400 ammo of the Volt Rifle is EXACTLY enough to destroy the building. Now go prove it to yourself and post your apology below.
