I know I read it somewhere, some characters have armor piercing bullets so I believe it is true. If you can kill the person inside of the vehicle you can eliminate both. I think I have been the recipient of this tactic. There are a lot of good snipers out there. Personally I stink at sniping at least in this game, not in real life (I was qualified sniper level in the US Army). Of course that was 20 years ago and since then I have been married and have 3 kids, it's no wonder that my nerves are shot.
