For the newer players out there, try to utilize kill zones. This is where various players will command different positions and create what are called " enfilade positions ". Usually your team can cover each other nicely and prevent anyone getting behind you. This is particularly deadly on maps like field and under where there is only one way out for the enemies vehicles. It also allows you to concentrate your firepower and makes it 10 times harder for them to coordinate a counter attack if they are taking fire from 4 different positions. Watch those havoc/sakuras though!
