I prefer to vary my mining tactics. I'll try different tactics on different maps. I've got a lot of c4 kills and one of the worst things you can do is to be predictable. Also if more than one person is mining let the other person know how many you have used. The limit is 30 and no matter how you use them 30 is all you get. When some mines get taken out replace them or put them somewhere else. Also it helps to place some of the less important mines 1st so that the important ones aren't the first to disappear.
