Hi, would you like to share your keyboard shortcuts? I found out from a friend that you can page/whisper to them in a game by1. press f2,2. type //theirname, it will usually autocompletehalfway through3. press spacebar4. type meg, hit enterYou'd be surprised how many people don't know this, I had to bug someone to get this info. If you find this helpful, give me a rating!   What are other shortcuts you have that is very useful (other than the standard stuff)? I'd like to hear them. Is there a way to copy and paste text so that you can send message fast, is there a mod/or just commands out there that allow you to program you own messages? maybe like shift+1 "you stole my tank, you jerk, i hope you get zapped", shfit+2 "I stole you tank, that is for repairing it in the open!", shift+3, "don't just stand there, shoot the enemy!"
