Post every host that cheats. Mirari- I think he stopped playing but it was a sniper match. It was one minute long and we had no \$\$\$\$. He bought a grenadier and started attacking my PP. In which he earned like 34 points. When I killed him I got like 3 points. HE won I lost it was laddered. If it was not laddered I wouldn't care one bit but he did it during a laddered. I know it just a game. But then when those people who are rank 435 say "no your rank is low your a newb" it really insults me.
