Stealth Tank Rushes on City own that map. You can sneak in through the left alley, behind the wf and BLAMO, it's gone in 10 secs with three or more ST. Also, by hugging close to the Barracks, you can get to the pp without too much damage to a stealth tank. If you have a five st rush, I recommend leaving one at the barracks to start hammering while your others go to the pp. That way, you draw all the hotwires to the barracks while your teammates destroy the pp. This seems to work about 99.9% of the time.
