Driving the harvester hasn't been the same since the harvy drivers got together and formed a union. They go on strike in two days time to protest the low pay and working conditions (low shielding in the harvester against the tiberium). The venue is being held outside the two main bases of GDI and the Brotherhood it starts at around 10.00am and will continue until our demands are met. Hope to see you there. POWER TO THE DRIVERS!!!!
