ever try it on light vehicles? It seems to be almost better than the basic rifle on humvees and buggies...I never noticed it until a few days ago, when I had just finished planting c4 in the HoN. I noted that the hummer I had left outside had been taken(big surprise), and was waiting ever so patiently for me.What did I do? I took a potshot at it, just for the heck of it(I figured I would be dead soon anyway). I was surprised at how much one clip did! One pistol clip's worth of ammo took a bar of health off the humvee! I reloaded and started jumping around, shooting it again and again...less than a dozen clips later(this was one bad driver/gunner...never shot me or ran over me, just tried to run away...into a wall), the vehicle blew up! Any other hidden abilities of this overlooked sidearm?
