First mission:Havoc is walking through the GDI training camp, and then a bullet zipps just next to him and he ducks out behind the power plant.Nosferatu, a elite killer with a Nod logo on his cap is hiding in the moutain with a sniper riffle and gets away.Havoc checks with Locke and hears that Kane wants him dead for what he did to his plan.Havoc gets orders to eliminate Nosferatu,you go out with 2 transport heli's to protect Havoc from getting killed.1 off them gets shot down and the others land near the Nod base.The mission starts:Primary objective: Kill Nosferatu.You walk up to the Nod base and enter the gate you need to be in the hand of Nod because there is where our target is resting.fighting your way through you reach the Hon head inside and kill Nosferatu.Then you get your second primary objective:EVA has detected a mainframe in the area.Objective: Hack mainframe and get info.Once you have done this you return to the drop of point and you have completed your mission.The info you downloaded seems to be info of nuking big city's in the USA.DC, New York, Los Angeles and Chicago.Havoc's mission is to infiltrate the 4 temples where the 4 nukes are held,(you wanted it to be hard right?)And sabotage the missiles.Thats a nice story huh?Well no thankstough I would post it here 2 because I like the idea.
