quote:Originally posted by kiwi98989:great idea!                    You know, I'd say I'd be better if you just had servers that cheat, not players. 'Cause, if a player who you know is going to join a game you are in, are you going to want to leave the game just for him, probably not. But, there's a server that cheats, with knowing that you probably will not join...Now you might say that you are going to warn others on the server about a cheater, but that really won't make a difference.
