quote:Originally posted by mynameisogun:5 remote c4 will kill a building when placed on the mct, but they will do virtually no damage when placed on a harvester and detonated close to the refinery. VIRTUALLY NO DAMAGE. DO NOT TRY THIS TACTIC. Someone said that it would do one tenth of the normal damage. Assuming this as true, it would take 50 remote or 25 timed c4s to blow up a building, I think. It would be better if you could plant beacons on the harvester.
