Well i have my own way of telling something. When a building is a little damaged i say Building needs repair! When its real damaged i say Building needs repair! Building needs repair! And when its in the dead zone i almost spam Building needs repair Building needs repair Building needs repair Building needs repair But it seems to get ppls attention And when there is an incoming tanks i say where it is and what it is, then i go Defend the base Destroy that vehicle Destroy it now Thats it hehe
