quote:Originally posted by snakeoil:I don't believe there was no C4 on the MCT in the Hand of Nod. I do that -constantly-. All you do is place remote and timed on the MCT. The second the timed blows, you blow the remote, and thus you hear "HON under..HON destroyed". In one second flat. You just didn't notice the c4. As far as that measly pistol you all speak of, try getting used to it. I've killed endless snipers, blackhands, ravesaws, prototypes, gunners, etc. with that so-thought wimpy pistol. Like he said above, 3-4 shots (which I can place easily, every time) to the head and you're done. So much for cheating.I aslo am so blind that I missed the c4 on the mct in the obilisk even though all the proxies inside and out of it were intact. Also I must have imagined the fact that the Obilisk never fired a shot. Yeah right, I've never even played before and don't know how to blow up a building or defend one. Also I use my pistol alot and do kill quite well with it but, You do not see a full armor character drop straight to 0 health in one shot very often. Sorry I'm not buying it.
