plant whatever prox c4 is left on a hard-to-see, yet vital area(right over a door), and wait for some poor dolt to walk in the door...boink! Best placement for mines you can use...and all it takes is one! or, If I'm a standard engie, I hide just inside the door until I see a nice juicy tank, then run like hell for it, getting killed on the way by the SBH that was waiting for me to do just that.
