Some people are wonderfull when they re in the opposing team :On mesa, we destroyed as Nod the AGT after a good apc rush. Then i came back with the well known combo steathBH/nuke, headed for the barracks and planted the nuke. Then i saw an engy, not a hotwire, but an engy repairing himself a mammoth !!!!! Even now i can't understand this !!! Repairing himself a mammoth with an engy is a waste of time !!! Why he didn 't ask to the teammates hotwires ??? And repairing a vehicle alone, espececially a powerfull one, when AGT is destroyed is a call to murder !!! Yes, you know what i did. That's obvious. I stole his mammoth (thx for repairing at 75%) and protect my nuke with, while shooting at the same time at the ref.... [May 19, 2002: Message edited by: n00by One Ken00by]
