quote:Originally posted by Devon: Mining the MCT is completely useless, ESPECIALLY in the HoN. All you have to do is stand some distance away and throw your C4 on it. In the HoN, there is also the nice upper floor from which you can easily drop your C4 onto the MCT. I agree but why don't you jsut do this... Plant 6 mines in the tunnel. Plant 24 mines in the main entrance. (The gap in the walls.) Then they take damage before they even get close to the buildings.
