this tactic is old...and also...all u have to do is rush in a humvee to the refine or hand...as easy as that, and also get a couple more engines, if a bunch of engines rush...they can kill u before u noe it..cause u'll be sure to hit the enemy hand while shooting, so when u hit it a whole lot of hands or infantry units come and kill u...and besides...a technician can disarm beacons in like 8 seconds...
