I prefer the suicidal soldier approach to destroying flame tanks. Jump at it and throw timed C4. Get run over.. respawn and repeat as necessary. Sure it takes time to exploded, but so does chasing flame tanks around and around buildings. Obviously a tank is better, but we're talking about infantry anyway.I just hate those people that put mines down everywhere trying to stop flame rushes, only in effect leaving our building MCTs vulnerable.[ May 03, 2002: Message edited by: kubi0461 ]
