quote:Originally posted by destruyax:In hindsight, after writing this, a few tips come out.- same premise holds true on Field - don't lay mines in the tunnels, as its wasteful and I've afforded many a beacon/stealth by disarming them. ALWAYS PLACE MINES WHERE YOU CAN EITHER HEAR OR SEE THE REPAIR BEAMS, AND NEVER GROUP THEM.the only prob with that is the enemy can shoot your build while in tunnels. I've seen it many times before, people left mines at entrance and rocket soliders rushed the build in front of entrance. I just put mines in the tunnel area and check on it ever so often to see anyone disarming or if anyhting missing.
