I find that a stealth soldier can also be good in other ways. I plant beacons in a spot that I can keep a good distance from it and still be able to shoot anyone that attempts to disarm it. Then when they attempt to disarm it I just get headshots of them. It works as long as a tank or really good class comes after me. oh, on hourglass once. We had taken out the AGT with a flame rush, one guy was shouting FLAME RUSH THEM over and over, yet it never worked cause they had like 5 mummies. I actually found that stealths are rather decent in this situation. There were like 4 at the time I was rushing alone, 2 on the left side of the AGT, one behind it and one on the right. Well, I didn't see any way to get into it until I saw the harvester, it got in the way of the one on the right and pushed it back, which gave me my way to get in. only thing I had to worry about was a lone havok that was in front of the harvester, I just ran that fool over and proceeded in, I was caught though. if I was a stealth soldier I would have done better because I tried to enter a mined building as tech and sadly, didn't make it.
