Subject: Can't we all just work together?

I usually prefer to go at it on my own, but that's because I always buggie/hummrush with a techie/hotwire (or go on foot). I have had too many bad experiences with letting people join my ride. What usually happens is that I drive us into the base, we place our C4 and have plenty of time to sit back and wait the 20 seconds until it's time to detonate the remotes. And yet, my idiot teammate usually detonates his remote C4 right away, instantly alarming the entire enemy team of our position event if I with skills and luck managed to get us into the base unnoticed. I HATE THAT! The moment they get two intelligent Hotwires in there our cause is lost (any one enemy can be stopped from disarming no matter how good he is, but two Hotwires is worse than an army of Mobius chars when you're out of remotes and the pistol is your only weapon).So I go alone, and it almost always work out just fine.
