I have play'd games we people just seem to get along as a team , and goals get accomplished , but alot of the time people go off on their own , sadly, like i had i nice flame tank rush going and only 1 out of 4 people stay'd with me for it , needless to say we were total ripped to shreds , and failed , but other times a team of 4 would get in heli's and hit building quickly and before a defence could be mounted half their base was gone
