quote:Originally posted by Devon:Both the PSG-90 (not the same as PSG-1) and the Barrett M82A1 (as well as other Barrett rifles) are .50 cal rifles with clips. I'm unsure exactly how many bullets there are in a clip, but I do think the Barrett has an optional extended clip with 20 rounds in it. Barrett Model 82 A1 has a 10-shot clip and an M-16A2 rifle stock. One of its heralded uses is being able to put a specialized HE round into a Huey's fuel tank or engine at extreme distances. The same projectile can also go through a military-issue Humvee's engine block at the same distance. The PSG-1 is more of a SWAT-type rifle - it doesn't respond to battlefield conditions well. Think of the Barrett Model 82A as (H3ll, might as well go with WWF 4nalogies) The Big Show, while the PSG-1 is more of a Rock. [ April 22, 2002: Message edited by: destruyax ]
