quote: grenadiers are perfeckt to kill em!they see black hands long time bevore patch and moebius does!vewwy long times be4!they are low cost (nothing to be exact), and do good damage! in islands or stuff like this, they are just perfeckt for tunnel defending! and when black hands are hit, everyone can see em! Yes Grenaders are good for spotting them as long you keep firing in random places. They Don't see any better than any other unit. Splash Damage is the key. Once you discover a stealth black hand or tank-->make sure you destroy them before they rest stealth. Base defending with anything with splash damage will help-->LOCATE AND DESTROY...
