If you are repairing your heli our just leaved it somewhere make sure you put some c4 on it. If someone steels it... Boom...Repairing your heli is never save.. black hands can be everywhere. I always repair my heli on top off weapfac or hand nod.But Watch where you jump out. Remember that you will jump out left of you vehicle.. So make sure that there is some room on the left of your heli. otherwise it will drop you next to the building... and your heli on top...
