Thanks for the advice guys! I'm spending half my game time reading all these tac&strats so I'm not completely useless, and while many newbs may dream of being snipers, my mouse sucks so I'm a tanker for now. When online I've found the best thing for me to do is be an engy, buy a tank and support my team, then if I lose the tank, stick around repairing my teams tanks on the field, jumping and twisting and running to avoid snipers myself. Anything else you think I should know, let me know.
