Best day today.A hotwire abandoned a mrls. Being a stealth BH, took it and ran the hotwire over.Under is a excellent map. Seeing that the GDI was hitting our base pretty hard with three mammoths, I withdrew to the side hill along the tiberium field. A weak mammoth began to withdraw, and I blasted it with two salvos of rockets, eliminated it.Seeing a GDI mammoth heading out to reinforce; I tried to make it to base...no success.I then stole a GDI APC. An APC and the reinforcing mammoth sieged our base. The APCs driver got out to repair the mammoth. Stole the APC and drove away.How can someone steal two vehicles in a row, from the same team?
