Well this is for you guys who dont give a flying fart about the points, and just care about the cash. trust me this works. i actually got 17500 credits this way.Rule Number 1: Earn 350 credits the "honest" way.Rule Number 2: Buy a Hotwire or Technician.Rule Number 3: Find a MCT close to a PT (IN YOUR OWN BASE)ule Number 4: Ready your Remote C4s Now comes the fun partStart C4ing the MCT. Remember: NO MORE THAN 3 charges at a time.Stand back.When it blows, Repair the MCT. Watch the sweet cash roll in!Your Score will probably go into the negatives, but who cares? You can get the more expensive units now. You can also do it with your team mates.

Also, accompany your team mates when they go to attack the enemy base. Heal your team mates often. If someone attacks you, take out your pistol and give it to them in the head.   Now if u want points and kills, thats a different story. Save up about 1400. Buy a Sakura or Havoc and a Buggy or Humm Vee. Go to some high place, hide the car, and snipe everyone around. When you get low on ammo, get in the car and take the quickest route back to the base. Once again, hide the car, Now, enter a building, go to the PT and get a Refill. Then go snipe some more. The Vehicle isn't nessecary, but it helps to keep you alive on the way back to base. Also, try to stay hidden. dont use Sniper Vantage Points, use places no one else noticed. If you hit, then the dude u sniped wont know what killed him/her. if u miss, duck down, and hide behind a tree. if the guy starts shooting you, strafe left and right, or else get in your car and get the hell out of there, cause hes gonna tell his team mates about that spot.Thats all from me, ENJOY!!!
