riiight, no turret. So every swinging d1ck engie can just come up on the side and place some c4 on it. If you did that, then you'd have to lower the price...and do you want the flamers to be any cheaper??? Man, you'd REALLY b1tch then...And stop this n00b covert whiny stuff about the flame tanks, you just don't like'em. Prolly suck when ya drive it, and hate them when i use them against you real good.
