I got a 33 / 2 k/d ratio a few minutes ago...Islands:I placed a beacon on the warfac with my stealth black hand. Got disarmed. I buy a laser chaingunner and destroy 2 mammoths and a mlrs. I buy technician and repair our refinery and hand that both got into yellow health. Then i saw a hotwire run in the hand. I bought an chem warrior and killed her good. Stealth and beacon, and saw a mammoth and mlrs coming. warned team, and the team attacked. i didnt shoot, and let my teammates die (now you will say bad, but in the end, it was the right decision). A hotwire gets out her mammoth and i steal it. I kill her and 3 others with my tusks and drive to the warfac which i destroyed with tusks. then i drove to the barracks and started shooting at it. i noticed it was being repaired and i placed my beacon. i got back in the mammoth and kept shooting at it. boom, game over, 4700 points for me.
