I actually like the rifle ALOT better than the ramjet. Because it has a faster firing rate, and you dont see the bullet as it flys by(the ramjet bullet emits a flourescent blue when you see it)And i dont know why, but I've had seriously bad luck with Havoc/Sakura, bein unable to hit things and gettin killed more easily and quickly than ne1 else. I have better luck ACTUALLY hittin people with the normal rifle and managed to achieve 11 kills and 1 death(my best so far) with Deadeye
